Speed caps

\$10 Mobile Plan	\$28 Mobile Plan	\$38 Mobile Plan	\$48 Mobile Plan
Speed capped at 100Mbps			

It is important to note that the speed cap on your plan is the maximum potential download speed for data included in your recharge/plan.

Typical speeds will often be lower, as mobile speeds vary due to the many factors listed below. Beyond the maximum potential speed for your selected plan, a speed cap does not indicate any difference relative performance for a specific plan compared to another plan with a different speed cap.

Factors influencing your actual speeds:

- The topography of your location (for example any obstructions of the line of sight to the base station);
- Your distance from the base station;
- The local weather conditions (like extreme heat or heavy rain);
- How many other users are accessing the mobile network from the base station at the same time (i.e., number of concurrent users);
- Whether your device supports the relevant mobile network spectrum bands
- The hardware and software configuration on your device;

The destination of your internet browsing session (eg a busy web server).

This is a summary only. The full terms and conditions and pricing for this plan can be found on our website at www.aldimobile.com.au/legals.
